

NORDYNE's designation for green heating and cooling products.

Definition: ecoLogic is the sign of environmentally friendly, high-efficiency heating and cooling products. Only the most energy-efficient, most environmentally responsible units receive our ecoLogic seal of quality.

Criteria: Rated as an Energy Star product for efficiency.

Use non-ozone-depleting refrigerant, such as R-410A, in cooling product.

Produce low nitrous oxide (NOx) emissions in furnaces.

Include multi-stage, variable-speed compressors for optimal indoor comfort and efficiency.

Feature "smart" control boards or diagnostic controls for total indoor air quality.

Incorporate noise-reducing features.

Products: 23-SEER iQ Drive® air conditioners, the most energy-efficient air conditioner on the market.

16-SEER air conditioners with two-stage compressors.

Two-stage, variable-speed furnaces rated 95.1% AFUE and higher.

Fully modulating furnaces.

16-SEER heat pumps with two-stage compressors.

14-SEER iHybrid dual fuel packaged units with four-stage heating, two-stage cooling and a variable speed blower.

14-SEER gas/electric packs with two-stage compressor and variable-speed blower.

14-SEER packaged heat pumps with two-stage, variable speed blowers.

Availability: The ecoLogic seal can be found in Maytag, Frigidaire, NuTone, Tappan and Westinghouse brands.
