**WIN THE LATEST REFRIGERANT TOOL
IN WWW.ECOLOGICHVAC.COM CONTEST**

New YELLOW JACKET Solar-Powered Digital LCD Manifold to be given away.

St. Louis, September 2, 2008 — From now until October 31, 2008, contractors can enter to win the latest and greenest refrigerant gadget at www.ecoLogicHVAC.com. Through their ecoLogic green program, NORDYNE is giving away a brand new YELLOW JACKET Solar-Powered Digital LCD Manifold.

Not even on the market yet, the new refrigerant gauge is powered by sun or artificial light instead of batteries – making it as green as the refrigerant it measures. The YELLOW JACKET TITAN 4-valve manifold works with eight refrigerants, including non-ozone-depleting R-410A. No battery to replace also means no hazardous waste, no battery replacement cost and no losing power during the middle of a call.

“NORDYNE is committed to energy-conserving technology,” says Dave LaGrand, president of NORDYNE. “First, we developed our 23-SEER iQ Drive air conditioner. Then we launched our ecoLogic family of high-efficiency products. And now, we’re partnering with YELLOW JACKET to promote green tools.”

To enter the contest and read the official rules, contractors should visit www.ecoLogicHVAC.com. To learn more about the YELLOW JACKET Solar-Powered Digital LCD Manifold, please visit www.yellowjacket.com or call (800)769-8370.

About NORDYNE.

A trusted name in the industry, NORDYNE designs and manufactures heating and cooling products for premium brands such as Maytag, Frigidaire, Westinghouse, Tappan and NuTone. The company’s 23-SEER air conditioner with iQ Drive® received the prestigious 2008 AHR Expo Product of the Year award. NORDYNE is headquartered in O’Fallon, Mo., with manufacturing plants located in the central United States. For more information about NORDYNE and its product offerings, please visit www.nordyne.com.
