**NEW MODULATING FURNACE FROM NUTONE CREATES
MOST EFFICIENT SPLIT SYSTEM AVAILABLE**

New iQ Drive® modulating furnace is 97+% efficient.

St. Louis, December 18, 2008 — NuTone has added another smart solution to its furnace lineup. The new NuTone iQ Drive® fully modulating furnace is rated at 97% AFUE and higher for ultimate comfort. And when it's paired with the 23-SEER iQ Drive air conditioner, it delivers ultimate efficiency.

How it works.

The NuTone iQ Drive furnace modulates between 15 and 100 percent of capacity, reevaluating the heating load every 60 seconds and adjusting its modulation accordingly. Through modulation, the furnace exactly meets the home's heating demands and maintains very tight temperature control.

“The NuTone iQ Drive modulating furnace creates constant comfort,” says Matt Lattanzi, director of product management for NORDYNE. “Plus, it's exceptionally quiet and incredibly convenient thanks to the iQ Drive controller.”

The iQ Drive controller allows the NuTone iQ Drive furnace to modulate down to as low as 15 percent of capacity. It also makes the contractor's job easier with complete system monitoring, service notifications, error codes and on-board diagnostics to save time on service calls. The iQ Drive controller also means the furnace is compatible with the iQ Drive air conditioner right out of the box.

For life, style, home and ultra efficiency.

While the new NuTone modulating furnace works with any split-system air conditioner, NuTone distributors and dealers have the option of pairing the iQ Drive furnace with the 23-SEER iQ Drive air conditioner for an unprecedented level of home comfort and energy efficiency.

“Contractors who are used to selling on good, better, best will need to add a fourth level for the NuTone iQ Drive furnace/air conditioner system – ultra best,” adds Lattanzi.

The NuTone modulating furnace also makes the cooling season more efficient. When paired with a matched 13- or 14-SEER outdoor unit, the NuTone iQ Drive furnace increases efficiency by up to 1 SEER point.

Because of its efficiency and smart control boards, the NuTone iQ Drive modulating furnace qualifies for the brand's ecoLogic green seal, giving NuTone dealers a marketing tool to reach environmentally conscious homeowners.

To learn more about the new NuTone iQ Drive fully modulating furnace, dealers and distributors should visit www.nutonehvac.com. NuTone Heating and Cooling Products are only available at Noland and selected Winair and Winnelson locations.

About NORDYNE.

A trusted name in the industry, NORDYNE has been designing and manufacturing reliable heating and cooling products for 90 years. The company focuses on creating genuine value for its customers through a unique combination of innovation, product performance and responsive support. NORDYNE uses proven technology to build smart residential NuTone systems. The company's 24.5-SEER iQ Drive[®] air conditioner received the prestigious 2008 AHR Expo Product of the Year award. NORDYNE is headquartered in O'Fallon, Mo., with manufacturing plants located in the central United States. For more information about NORDYNE and its product offerings, please visit www.nordyne.com.
